HETRONIC

NOVA-L

The HETRONIC **NOVA** family of transmitters sets the standard for today's industrial radio remote controls. The **NOVA-L** impresses with its sturdy but attractive design. No compromises are made in regard to functionality and operator friendliness.

Typical Applications:

Like most Hetric products, the NOVA-L transmitter is designed to fit a broad variety of applications. It's ideal for loader cranes, tower cranes, overhead cranes, concrete pumps and other mobile equipment.

The **NOVA-L** is available with either two dual-axis joysticks (digital or proportional) or with up to six fully-proportional paddle levers. It comes standard with a battery charger and two rechargeable batteries.

Hetric offers the **NOVA-L** pre-engineered and "off-the-shelf" for the most common applications. However, the **NOVA-L** is also available as a customized solution. Please contact Hetric and our engineering staff will tailor a **NOVA-L** system to your needs.

The ergonomic and lightweight design allows operators to easily access control elements. The joysticks or paddle levers permit a smooth operation of the machine without operator fatigue.

The **NOVA-L** in combination with a Hetric's BMS-2 or modular-design receivers assures effortless integration of the machine circuitry.
