

## Environmental Policy

**Methode's Scope** - Design and manufacture of switches and associated products for use in the automotive industry. Design and manufacture of power distribution and sensor products. Design and manufacture of radio remote controls and associated electronic and mechanical components. Manufacturing of printed circuit boards.

**Methode** is committed to ensure the environmental integrity of its business processes and facilities are in line with ISO 14001. The **Methode Electronics Malta Ltd.** environmental principles are:

- **Protection of the Environment** through the prevention of pollution from our processes, efficient use of natural resources, control and monitoring of releases to the environment, control and if possible elimination of Environmentally Hazardous substances from our products and the manufacture or recovery of products from secondary materials. This shall be achieved through the setting up of viable Environmental Objectives, developing our EMS as a system of preventive action, use the life cycle concept to better control and influence our products, services and activities.

- **Compliance** with all compliance obligations and relevant interested parties
- **Continual Improvement** of our Environmental Management System through;
  1. *The Enhancement of our Environmental Performance through the Environmental Evaluation Process.*
  2. *Fulfilment of all compliance obligations.*
  3. *Achievement of our Environmental Objectives.*

**Methode Electronics Malta Ltd.** is committed to communicate its environmental policy to its stakeholders and, as far as it is practicable, to the general public. The company maintains its environmental commitment through employee training and awareness of environmental issues and performance.
