Providing Safe, Efficient RRC Solutions
From Simple to the Most Complex Industrial Operations

The following is the eleventh installment of a 12-part series exploring the question:
Who is Hetronic in the Radio Remote Control Industry, and why Should I Care?

As a global market leader, Hetronic provides some of the most reliable and cost-effective RRCs in the world.

From operating simple overhead cranes and hoists to controlling complex manufacturing and materials handling operations, you can depend on Hetronic to provide safe, reliable, cost-effective RRC solutions.

Since many industrial operations require multiple transmitters and receivers to be **continually and simultaneously** operated in close proximity, frequency interference is always a central concern.

At Hetronic, we’ve got you covered. Our products are equipped with a variety of proven interference protection features such as manual, AUTX and SCAN modes, grouped channel configurations, electromagnetic compatibility (ECO) protection, short range start up capability, and more.

We listen carefully to understand your operational needs, and partner with you, to provide the most cost-effective, safe and reliable systems to meet your exact requirements.

Whether your operation calls for one of our off-the-shelf standard configurations or a completely tailor-made system, our wide range of versatile products allows you unprecedented choices and flexibility.

Through global manufacturing and representatives in over 45 countries, our service and support network helps maximize your “uptime,” no matter where you work in the world.

**LOCAL BUT GLOBAL**

Pictured above: As many as 30 Hetronic transmitters are constantly used in this Dutch flower auction hall.

The Choice is Yours
To name a few, Hetronic’s Ergo F, Pocket and Mini transmitters are also popular choices for industrial applications.

**Your Number 1 Partner in Radio Remote Controls**

Specializing in High Quality, Safe, Reliable and Affordable RRC Solutions since 1982
